High gloss V4 edge banding UV varnish

PRODUCT DESCRIPTION

High gloss U.V. curing varnish to be applied rotative pad printing or roller coater on top of PVC extruded plastic profiles. This varnish provides an excellent adhesion on PVC, very good chemical resistance and excellent surface finish, being able to provide outstanding gloss levels of over 95 at 60° with the correct application system. The varnish provides a crystal clear finish.

Recommended applications:

PVC edge bands.

Finish:

Gloss. .

Presentation:

It is ready for use.

Drying:

Under 120 W U.V. lamp, it superates the talc trial at speeds of 20-25 m/min. It can be printed in online machines or offline machines

Shelf life:

Jee

The product has a shelf life of 1 year from its manufacturing date in regular storage conditions (10-25 $^{\circ}$ C; 30-70% relative humidity).

Other comments:

In case it is needed, the adhesion can be increased by combination with 5% of additive **29.140**. Its mixture will reduce the shelf life of the varnish. The varnish **80.00.04986** is formulated with chemical raw materials that will reduce yellowing when exposed to direct sunlight.
