

## 40 SERIES | NYLONTRANS

### Product description

One component ink which is designed for the manufacturing of heat transfer decals on nylon, canvas, linen, leathers, etc.

40 SERIES, once it has been transferred, leaves on all these materials a thin, hard, highly flexible and well-adhered film. Its covering power on dark surfaces is excellent. It can also be applied directly on nylon and other non absorbing materials.

#### Recommended applications:

Heat transfer decals on nylon, canvas, leathers,...

#### Finish:

Gloss.

#### Presentation:

Only viscosity needs to be adjusted, depending on the job, factory temperature and impression speed.

#### Other observations:

It is critical to apply the different layers/colours in the correct order.

#### Diluents:

D-200 as fast to normal and D-400 as normal to slow. Its adequate mixtures provides a good behaviour in the screen with short drying times when dried to the air, depending on the material, job and ventilation.

#### Screens:

Emulsion with ARGAZOL-E (easy decoating) or ARGAZOL-UV (high performance and definition) with meshes from 90 to 130 meshes/cm.

#### Security:

Carefully read the label directions and the tab Security of this ink.

#### Colors
