

880 SERIES

U.V. CURABLE PIGMENTED INKS

Product Description

This ink set is designed with state of the art pigment set to offer bright and vivid colors and offers one of the best outdoor life of any other U.V. curable inks currently available in the marketplace.

These inks were specifically designed for roll to roll printing where flexibility is a major issue and are reliable with minimum head maintenance is required. The inks print on most of the plastics,

including acrylics, vynils, treated metals and treated glass. The inks have good adhesion, high scuff and scratch resistance, excellent chemical resistance, outstanding flexibility and are designed for long term outdoor signage application. These inks are typically used for outdoor signage, banners and trade show graphics, as well as many other industrial applications. They are mostly used on machines with **Konica Minolta® 512 heads, Spectra®, Seiko® SPT and Xaar® 500 heads.**

Good results have been achieved with LED lamps, although due to their different types, trials must be performed.

We offer one of the best pricing in the industry for our customers to maximize their profits achieving at least the same performance and reliability than with the original inks.
