

862 SERIES

U.V. CURABLE INKS

Product Description

This rigid ink set is designed with state of the art pigment set to offer bright and vivid colors and offers one of the best outdoor life of any other U.V. curable inks currently available in the marketplace and probably the widest s. These inks were specifically designed for Kyocera printheads with variable dot size and are reliable with minimum head maintenance. These inks have performed excellent on other printheads, such as Konica Minolta 1024i, Konica Minolta 1024, Konica Minolta 512i and 512, and Seiko 508. The inks print on most of the plastics, including acrylics, vynils, treated metals and treated glass. The inks have excellent adhesion, high scuff and scratch resistance, excellent chemical resistance and are designed for long term outdoor signage application. These inks are typically used for outdoor signage, banners and trade show graphics, as well as many other industrial applications. They offer outstanding adhesion on difficult plastics, such as polypropylene, acrylic sheets, etc...

We offer one of the best pricing in the industry for our customers to maximize their profits achieving at least the same performance and reliability than with the original inks
