Ultracrystalline UV screen varnish

PRODUCT DESCRIPTION

High gloss ultracrystalline U.V. curing varnish to be applied by screen printing specially designed to print on papers, cards and cardboard, PVC, PP or PE laminates and virtually all type of plastic sheets. High adhesion on difficult materials such as PE or PP laminates and offset inks has been obtained. The formed film, once it has been cured has excellent flexibility which permits die cutting afterwards. The particular rheology of this product makes it especially appropriate for high speed printers in narrow web printing.

Recommended applications:

Papers, cards and cardboard, laminated or not, offset inks, virtually all plastic materials.

Finish:

Gloss.

Presentation:

It is ready for use with screens of 150-180 meshes/cm at 20°C

Drying:

Under 80 W U.V. lamp, it superates the talc trial at speeds of 30-35 m/min.

Emulsions and meshes:

Emulsion with ARGAZOL-UV with meshes from 150 to 165 meshes/cm.
