BOARD ERASE UV VARNISH

PRODUCT DESCRIPTION

Gloss U.V. curing varnish to be applied by screen printing specially designed to produce a low energy surface that after being inked with a permanent marker can be erased easily with a dry cloth. The formed film, once it has been cured, has excellent flexibility which permits die cutting afterwards. Due to the variety of permanent markers on the market and the impossibility to know if they make changes in their formulation, it is strongly recommended to make tests before industrial printing. This varnish is non-yellowing.

Recommended applications:

Papers, cards and cardboard, PVC films and banners.

Finish:

Gloss.

Presentation:

It is ready for use with screens of 150-165 meshes/cm at 20°C.

Drying:

Under 80 W U.V. lamp, it superates the talc trial at speeds of 25-30 m/min. In cylindrical machines, it can be printed up to 3500 sheets per hour.

Emulsions and meshes:

Emulsion with ARGAZOL-E or ARGAZOL-UV with meshes from 150 to 165 meshes/cm.
