UV VARNISH

PRODUCT DESCRIPTION

U.V. curing varnish to be applied by roller coater of flexo unit specially designed to print on papers, cards and cardboard. The formed film, once it has been cured has a high level of flexibility which permits die cutting afterwards. The material has a higher viscosity than regular roller coater varnishes.

Recommended applications:

Papers, cards and cardboard, offset inks.

Finish:

Gloss.

Presentation:

It is ready for use with regular varnishing anilox sizes.

Drying:

Under 120 W U.V. lamp, it passes the talc trial at speeds of 80-85 m/min.

Other properties:

This varnish is a high viscosity roller coater varnish, which will work properly on specific machines. Due to the different nature of the materials existing in the market, it is recommended to do trials prior to industrial production.
