UV VARNISH

PRODUCT DESCRIPTION

U.V. curing varnish to be applied by roller coater of flexo unit specially designed to print on papers, cards and cardboard. High adhesion on difficult materials such as PE or PP laminates and offset inks has been obtained. The product can be overprinted or foil blocked without problems. The formed film, once it has been cured has a high level of flexibility which permits die cutting afterwards. It is also a non yellowing product that will provide a premium finish to your printed materials.

Recommended applications:

Papers, cards and cardboard, laminated or not, offset inks.

Finish:

Gloss.

Presentation:

It is ready for use with regular varnishing anilox sizes.

Drying:

Under 120 W U.V. lamp, it passes the talc trial at speeds of 80-85 m/min.

Other properties:

This varnish is especially suitable to be overprinted or foil blocked. Due to the different nature of the materials existing in the market, it is recommended to do trials prior to industrial production.
