

639 SERIES

## WATER BASED PIGMENTED INKS

### Product Description

This ink set is developed with the highest technology to offer strong, bright and clean colors, providing one of the best ranges on the market. These inks are specially designed for Kyocera® KJ4B printhead.

The inks offer an excellent runnability, offering a fast drying time while still being extremely stable on the heads. These inks are used primarily on polyester, but can work very well on many other fibers. They can also be applied directly to fabric and later calendared.

We offer one of the best prices on the market so that our customers get at least the same performance and reliability as with original inks at a lower price.

### Technical Data Sheet

#### Technical specifications

##### Available Colors

Black	
Cyan	
Magenta	
Yellow	
Light Magenta	
Light Cyan	
Orange	
Blue	
Fluo Yellow	
Fluo Red	
Flush	

##### Shelf Life

12 months

##### Specifications

Viscosity: 5-8 cPs 25°C

Surface tension: 32-35 dyn/cm

Lightfastness (EN ISO 105B02):  
 colors between 5/6 to 6/7

Resistance to washing (EN ISO 105C02):  
 all colors are 4/5

Alkali resistance (EN ISO 105E04):  
 colors are between 4/5 to 5

##### Supply

5 and 25 liter bottles.

#### Inks are available in Specific Formulation for the following Printers

Sublimation printers equipped with Kyocera® KJ4B
