

666 SERIES

TEXTILE INKJET INKS

Product Description

This ink set is developed with the highest technology to offer strong, bright and clean colors, providing one of the best ranges on the market. These inks are specially designed for Konica Minolta® 1024 and Ricoh® Gen5 printhead machines to be stable with minimal maintenance. The inks have an excellent color gamut, very high opacity and exceptional wash resistance.

These inks work on 100% cotton and mixtures with fibers up to 50%. The inks offer excellent washing and crock resistances, keeping vivid and vibrant colors after many washes.

We offer one of the best prices on the market so that our customers get at least the same performance and reliability as with original inks at a lower price.
